Medical-Grade Accessories

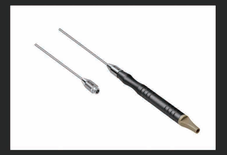

Worldwide collaboration, Compliant with CE/FDA Certification

Surgical Zoom Handpiece

MFF Handpiece

Proctology Handpiece

Surgery Handpiece

Focusing Handpiece

Lipo Handpiece Pro
Length: 100mm,150mm,200mm,
250mm,300mm

Gynecology Handpiece

Bare Fiber

Radial Fiber

Conical Fiber

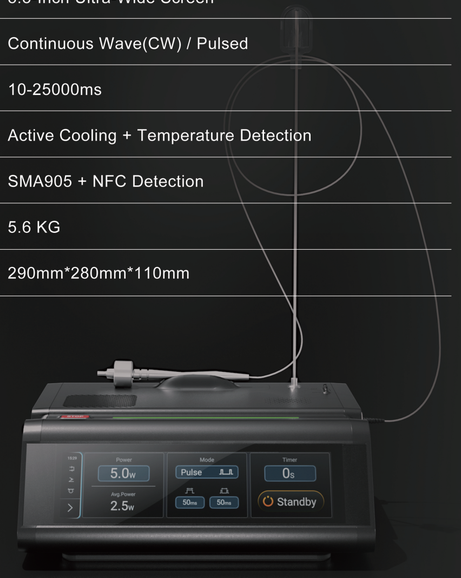

Safety Goggles

Fiber Stripper & Cutter

Technical Specification

Wavelength	1940nm
Max Power	10W
Aiming Beam	650nm < 200mW
Display / Control	8.8-Inch Ultra-Wide Screen
Operation Modes	Continuous Wave(CW) / Pulsed
Pulse Width	10-25000ms
Cooling System	Active Cooling + Temperature Detection
Fiber Connection	SMA905 + NFC Detection
Weight	5.6 KG
Dimensions	290mm*280mm*110mm

Wuhan Pioon Technology Co.,Ltd.

MZ Medical Laser System

1940nm 10W

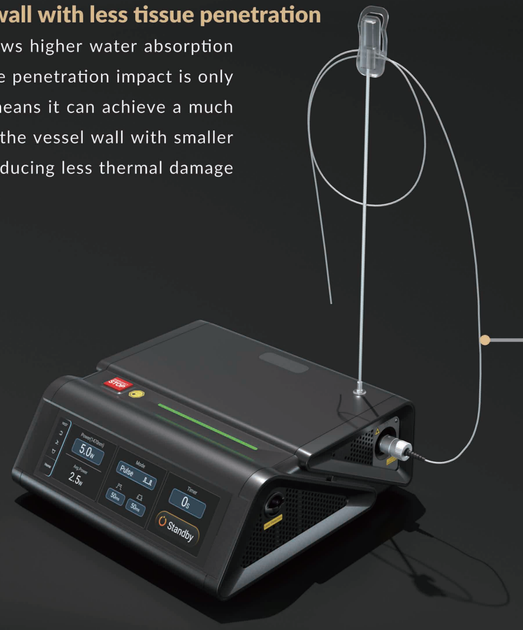

Where Precision Meets Innovation

Why Choose the MZ 1940nm 10W?

Direct to the vessel wall with less tissue penetration

1940nm significantly shows higher water absorption rate while effective tissue penetration impact is only about a quarter, which means it can achieve a much better ablation effect on the vessel wall with smaller dose of energy while producing less thermal damage to the surrounding tissue

Unique design for 1940nm

Reliability from Top-level Technologies

While choosing laser modules from world-class laser diode supplier, Pioon has developed and patented the Original Advanced Laser Stabilization System for the 1940nm phlebology system. Laser diode of 1940nm will generate extremely high amounts of heat when operating. We have adopted high-performance materials and the assembly of patented low volume dual-fan cooling system, which perfectly control the stability during the clinical procedure in the case of high threshold current and high heat generation.

Key Advantages of the MZ Laser

Power Detection Sensor:

The MZ laser's advanced power monitoring and on-demand calibration feature maintain precise energy output, ensuring consistently reliable treatment quality for optimal clinical resultsa

SMA905 + NFC Connector:

Certified fiber recognition supports safe, accurate procedures across clinical applications.

8.8-inch Ultra-Wide Display:

Provides superior visibility and a seamless, us-er-friendly interface.

Comprehensive Support and Services for Your Success

- **Available Marketing Support Services**
- **Available OEM/ODM Services**
- **Available After-Sales Services**
- **Available Educational Training Services**
- **Available Clinical and Technical Support Services**

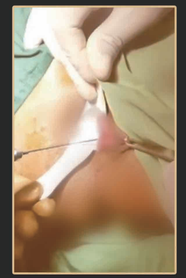

VERSATILE LASER TREATMENT

(Training Available)

Phlebology

The MZ laser's 1940nm wavelength is optimized for Endovenous Laser Treatment (EVLT), targeting water-rich tissues within the vein wall for precise and effective ablation. This specific wavelength minimizes collateral thermal spread, safeguarding surrounding structures and enhancing patient recovery. The result is controlled vein closure with reduced postoperative discomfort, making it an ideal solution for managing varicose veins.

Proctology

In proctologic applications, the MZ laser's 1940nm wavelength enables precise coagulation, carbonization, and vaporization of diseased tissue for conditions such as hemorrhoids and anal fistulas. Its selective absorption allows targeted removal with minimal impact on adjacent healthy tissue, promoting faster recovery and enhanced procedural efficacy for patients.

*Now with power detection sensor, doctors can achieve **truly precise** surgical procedures, minimizing surgical isks and reducing postoperative reactions to the greatest extent.*
